

Tyrewise

**Operational delivery plan**

# **Scheme Manager Report**

Milestone 1: 1 July 2024 - 31 December 2024

*Pre-launch activity July and August  
Operational data from September  
Expectations for October*

The background of the page features a large, circular arrangement of teardrop-shaped arrows. These arrows are light blue and point outwards from the center, creating a sense of expansion and movement. The overall color scheme is a monochromatic teal or light blue.

**Ko te pae tawhiti, whāia  
kia tata. Ko te pae tata,  
whakamaua kia tīna.**  
**Seek out distant horizons  
and cherish those you attain.**

Just as our *tohu* (logo) the *ruru* or New Zealand native owl is a watchful guardian over the *ngahere* (bush), so must we all act as watchful guardians over the progress of Tyrewise.

This report from the scheme manager is for Milestone 1 of the Operational Delivery Plan. It covers two months prior to the operational launch of Tyrewise, one month of operations, and expectations for the second month of operations.

## Objectives and outcomes

	<b>Objective</b>	<b>Outcomes</b>	<b>Page</b>
1.	Transparent and accurate reporting of tyre movements and financial transactions (waste tracking and payment systems).	1	4
2.	Tyre transportation		10
	a. volumes		
	b. take back service (tyre collection network)	2	
3.	Tyre processing volumes.	3, 4	16
4.	Accurate budget estimation, spending and forecasting	5(a), 5(b)	18
5.	Market growth and investment strategy	6	20
6.	Participant Awareness / satisfaction	7	22
7.	Participant compliance	8, 9	26
8.	Scheme delivery audits by the Ministry for the Environment		30
	Registered scheme Participants by region		32
	Forecasted vs actual expenses		44

### Note:

- EPU stands for a standard measure called the Equivalent Passenger Unit (EPU). An EPU is equivalent to the weight of a 'typical' passenger tyre (9.5kg of tyre)
- ELT stands for End-of-life tyres
- Ministry or the Ministry refers to the Ministry for the Environment unless otherwise stated
- OTR refers to oversized off-the-road tyres
- PSO refers to the product stewardship organisation, Auto Stewardship New Zealand (ASNZ)
- TDP stands for tyre derived product(s)
- TDP stands for tyre derived fuel
- The fee refers to the tyre stewardship fee

# Objective 1

## Transparent and accurate reporting of tyre movements and financial transactions (waste tracking and payment systems)

During the first year of the Tyrewise Scheme, the Scheme Manager will effectively utilise the waste tracking and payment system to:

- Provide a high-quality service to users.
- Record information about mass balances including materials flow from collection to reuse.
- Transparently provide this information to the Ministry for the Environment (the Ministry) and the Public (in aggregated form if required to protect commercially sensitive information).

From 1 September 2024, the Tyrewise Scheme software (waste tracking tool) and payments system will provide information related to the Expected Scheme Effects (see Gazette Notice for General Guidelines for Product Stewardship Schemes for Priority Products Notice 2020 [Gazette Notice 2020]). Relevant information includes Fee usage by the Scheme for incentive payments and other operational payments made to registered participants for end-of-life tyre (ELT) collection, transportation, and processing services; volumes of ELTs diverted from landfill for end-use higher up the waste hierarchy; availability/capacity of collection sites across New Zealand, including by location; and clear provision of information about the Scheme, use of funding, and how to access collection sites.

### Reporting Requirements

- Tyrewise shall report all relevant (non-confidential) information to objectives on their website in a form of their choice as an externally facing public update.
- The Ministry will have a series of reports created for them that they can run at any time to deliver this information in real time.
- Additional information to the 'live' information available via the 'Dashboard' will be reported to the Ministry through quarterly and annual reporting, which will be kept confidential by the Ministry.

### Outcome #1 for Objective 1

Effective management of the Waste Tracking System (Tool) and MYOB Advanced (registered parties, Payments System) to ensure uninterrupted, reliable, transparent, and accurate tracking of:

- the use of the Fee by registered parties eligible to receive payments, and
- Mass balances of tyres collected, transported, and processed through the Scheme.

Effective management of the Xero (PSO) payments system) to ensure uninterrupted, reliable, transparent, and accurate tracking of the use of the Fee by non-registered parties eligible to receive payment (such as management and governance costs)

# Objective 1 targets for this period

## General targets

- a. Continuous improvements and updates to the Tools
- b. Tool accurately and consistently recording materials flow (mass balances) by registered participants.
- c. Payment Systems accurately and consistently recording Fee remitted to registered participants and service providers.

- d. Quarterly reporting of data collected from the Waste Tracking System Tool.

## Specific targets

- e. Payment System(s) accurately recording 99% of all payments.

## Tyrewise reporting tools

The Tyrewise Reporting Tools are collectively made up of the web based Tyrewise App and payments system (MYOB Acumatica) which track the movement of waste regulated tyres through the take back network and send verified data records for payment. This enables service providers to be paid based on two points of independent verification, and processors and manufacturers to receive their incentive payment based on evidence of eligible sale to the domestic market.

Auto Stewardship New Zealand (the Product Stewardship Organisation, or PSO) uses Xero to record non-participant payments for services such as governance and operations.

### Tyrewise application (app)

The purpose of the Tyrewise app is to capture data at multiple points in the process from collection through to final end-use.

The app is web based and uses a two point verification system that ensures volumes of waste regulated tyres are tracked, the risk of fraud and leakage from the take back network is reduced, and accurate collection volumes are sent to the payments system. The app tracks loads which are sent directly to a processor, or via a transport hub that accumulates tyres to maximise transport efficiencies.

The Tyrewise app enables those registered participants that have waste regulated tyres to book the number

of tyres by type they have for collection and then to select their nominated transporter.

The transporters can see who has bookings for them, and through an added function, can pull these bookings through into a run sheet for their drivers.

The processors also have visibility of what jobs and volume of tyres by tonne will be delivered to their site, enabling them to manage incoming volumes.

The Tyrewise Scheme manager has visibility over this whole process and can trouble shoot where required. It has a national view on where tyres are going to and when, and also where customers may have been waiting too long for their collections.

In addition, the Tyrewise Scheme Manager can book special jobs where the person is not a registered participant but has waste regulated tyres for collection.

### Testing and deployment

During this reporting period, we carried out end-to-end software testing with two registered partners who operate an integrated transporter and processor model. We chose these organisations because they carry out the most steps in the process and have the most complex transactions.

We tested all steps in the system from booking collections through to verified and approved transactions being sent to the payments system.

Prior to deployment, we held a webinar for registered transporters on using the software.

The software was deployed on 27 August. We sent log in information and links to quickstart and user guides to users from organisations which had completed registrations.

Since then new users have been notified as their organisation has completed the registration process.

### Improvements

Since the software deployment we have rolled out a number of bug fixes and improvements.

Bug fixes and suggested improvements are captured in an agile project management tool, then assessed and prioritised in a regular development cycle.

### Software Reporting

High level reporting is available when users are logged into the software and some data is also fed into a dashboard on the Tyrewise website.

Exception reporting is being developed to identify situations that differ from what is expected.

The identified situations can then be evaluated to determine what action, if any, needs to be taken.

The key areas of exception reporting are:

- Identifying anomalies that may indicate attempts to 'game the system'
- Identifying locations or organisations that may not be meeting their consent requirements and are at risk of stockpiling.
- Identifying areas of operational inefficiency, in order to capture data that can lead to

improvements. Some examples of that are transport services matched to types of tyres regularly made available for collection in a region.

The interface with the payments system is working as expected. Verified transactions sent to the payments system are being reconciled.

Between the operational launch of Tyrewise on 1 September and 30 September 2024 (inclusive), a total of 1,048 payment transactions were sent through to the payments system.

100% of these have been batched for payment, approved, and paid by the product stewardship organisation (PSO), Auto Stewardship New Zealand (ASNZ).

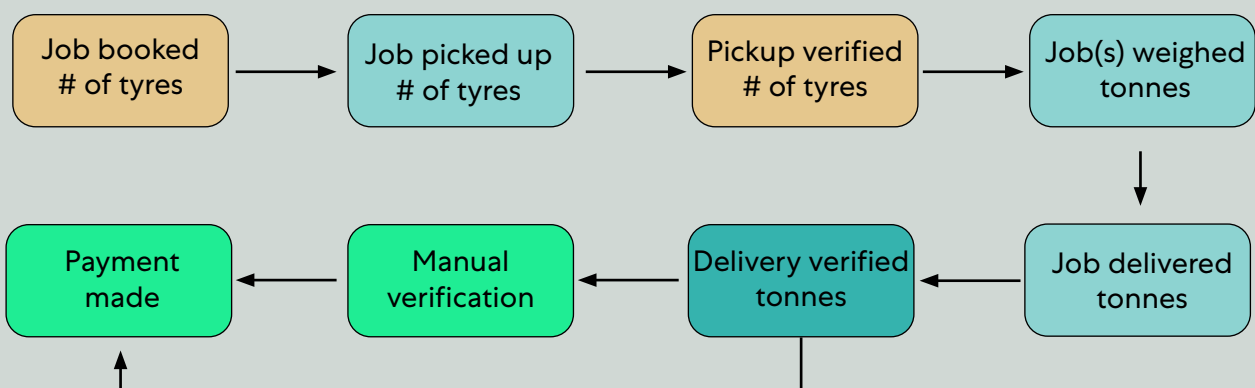

We expect to see a similar number in October, the second month of operations.

September 2024 is the first month in which transactions are being paid for, this first month has seen a larger proportion of jobs held for intervention as users learn how to use the app, and we ensure that the jobs match the agreed terms of service level agreements. This intervention will remain in place until we are confident that there is a high level of accuracy between collection weights and weighbridge verification weights.

### ASNZ Non-Registrant Payments

All non-registrant invoices submitted for payment during the reporting period have been paid in full and on time.

### Software data collection points (end-of-life tyre collections)

Manual verification is undertaken when there is an incomplete process such as verification step missing or anomaly in estimated vs actual weights.

<span style="display: inline-block; width: 15px; height: 15px; background-color: #f4a460; border: 1px solid black; margin-right: 5px;"></span> End-of-life tyre generator	<span style="display: inline-block; width: 15px; height: 15px; background-color: #80cbc4; border: 1px solid black; margin-right: 5px;"></span> Transporter

# Tyrewise partners

Unloading three days of  
collections at a Manawatū  
transport hub

# Mass balance data

Data shown is for imported loose tyres, and vehicles first road registered from March to August. This data is updated monthly.

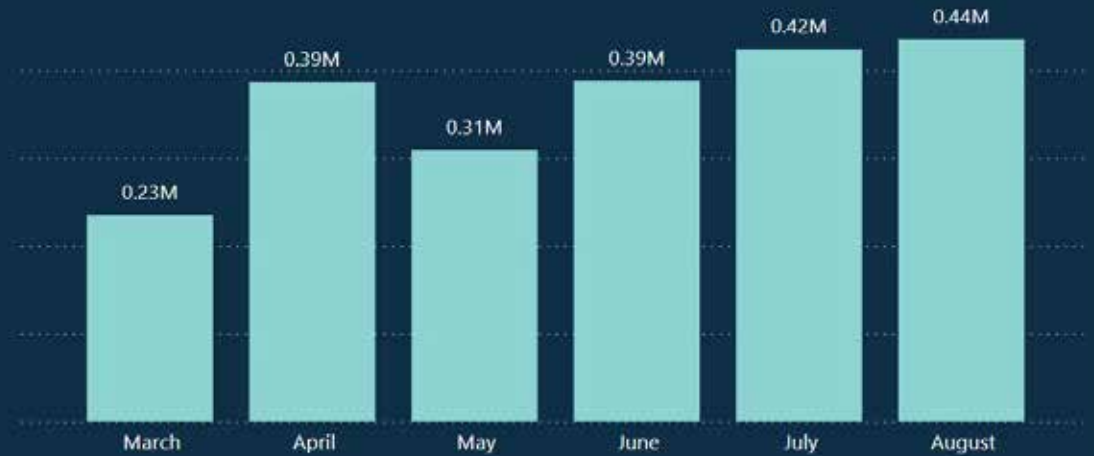

Data from the Tyrewise app is for the first four full weeks of operation from 1 September.

To date no claims have been made by processors or manufacturers, although we are aware there are some that are imminent.

## Objective 2

### Transportation - 2 (a) Volumes

During the first year of the Tyrewise Scheme, registered tyre transporters will transport more than 17,000 tonnes of ELTs via established registered collection network (e.g., tyre retailers, transfer sites and generators) and/or new registered collection services (e.g., community collection centres).

Registered tyre transporters will deliver ELTs to registered tyre processors, examples of which include Waste Management's tyre shredder in Auckland, Tread-lite shredder in Cambridge and Tyre Collection Services in Christchurch.

#### Reporting Requirements

Data on the performance of collection operations (e.g., number of collection sites; North Island vs South

Island), will be shared with the Ministry through the waste tracking system, quarterly and annual reporting, including geographical location/distribution of tyres collected.

#### Outcome #2 (a) for Objective 2 (a)

Effective nationwide transportation of tyres to established and new domestic processing end-uses through:

- Contracts with existing transportation services to manage the current demand for ELTs.
- Contracts with new or existing transportation services to manage increases in demand for ELTs as required.

## Objective 2 (a) targets for this period

### General targets

- Continue identifying gaps in New Zealand's ELT transportation services market.
- Continue executing contracts with transporters.  
Updated list of contracted participants.
- Quarterly reporting of tyre transportation contracts and volumes.

### Specific targets

- Additional 4,000 tonnes of tyres transported to verified domestic end-use (7,500 tonnes total).

Registered transporters for Tyrewise were appointed via a robust tender process. This was managed externally by Caroline Boot of NZ Procurement & Probity Services, to ensure a fair process.

The tender for transporters opened on 21 June 2024, there was a deadline for questions of 11 July 2024, and closed at 2pm on 17 July 2024. Tenders received were assessed by a panel of evaluators.

Some transporters are appointing subcontractors that are already Tyrewise registered participants, in line with their service level agreements.

### Gaps in the network

All regions in Aotearoa New Zealand are serviced by a minimum of two registered transporters, with the exception of Gisborne, which currently only has one.

The transport of large off the road (OTR) tyres is

challenging. We continue to work with transporters and processors on how best to manage these. We are currently asking retailer / fitters and generators to book collections of OTR tyres separately to other tyres. This will allow us to better understand the volumes and patterns.

We expect to have more solutions for processing OTRs resolved during October.

### Volumes transported

There were no collections in the first reporting period. Collections commenced on 1 September and over 4,000 tonnes were collected in the first month of operation.

We anticipate a similar volume will be collected in October, reaching or exceeding the total target for this reporting period.

## Objective 2

### Transportation - 2 (b)

### Take-back service (tyre collection network)

During the first year of the Tyrewise Scheme, nationwide collection, being both established services (e.g. tyre retailers, transfer sites and generators) will receive tyres from their own activities / services provided to customers, and new collection services (e.g., community collection centres), will receive tyres from consumers at up to 5 tyres per visit.

This is to provide a free and accessible take-back service. All tyres received by collection services will enter the Scheme via registered transporters (as specified in Objective 2a).

Tyrewise Scheme will quantify the number of tyres received at collection sites for the purposes of:

- Future market analysis (Objective 5)
- Identifying and reconciling tyre leakage downstream of collection (refer to Risks and Mitigations).

### Reporting Requirements

Data on the performance of collection operations (e.g., number of collection sites; North Island vs South Island), will be shared with the Ministry through the waste tracking system, quarterly and annual reporting, including geographical location/distribution of tyres collected.

### Outcome #2 (b) for Objective 2 (b)

Free and accessible collection of tyres at registered collection sites (including generators, retailers, transfer stations and community networks) through:

- Contracts with existing collection sites (i.e., retailers) for ELT collection nationwide.
- Contracts with new collection sites (i.e., community transfer stations) ELT collection nationwide.

### Registration progress

## Objective 2 (b) targets for this period

### General targets

- a. Continue identifying gaps in New Zealand's ELT collection site infrastructure
- b. Contracts with collection sites are established and maintained for actual volume of ELTs collected over the quarterly period
- c. Updated list of contracted participants is provided to the Ministry

- d. Measure ELT volumes collected for future market analysis and identifying tyre leakage from scheme
- e. Quarterly reporting of tyre collection contracts and volumes

### Specific targets

- f. N/A

## Take-back network

The take-back service is intended to be available to any person, including any consumer or commercial user.

Commercial generators of waste regulated tyres, including tyre retailers, and fitters form the foundation of the take back system by retaining waste regulated tyres at end of life, thereby removing the burden from the public or commercial user of taking these tyres to a facility.

These commercial retailers and generators receive free collection of waste regulated tyres by registered Tyrewise transporters.

Public collection sites are typically offered by local government transfer stations or private resource recovery centres, where the facility is convenient for non-commercial users to access and drop off waste regulated tyres that are not retained by the tyre retailer or fitter.

We initially estimated that there would be over 6,000 registered partners in total, the majority of which would require collections.

All communications emphasised that registration was required by 1 March 2024. Despite this, significant number of registrations have been received during this reporting period.

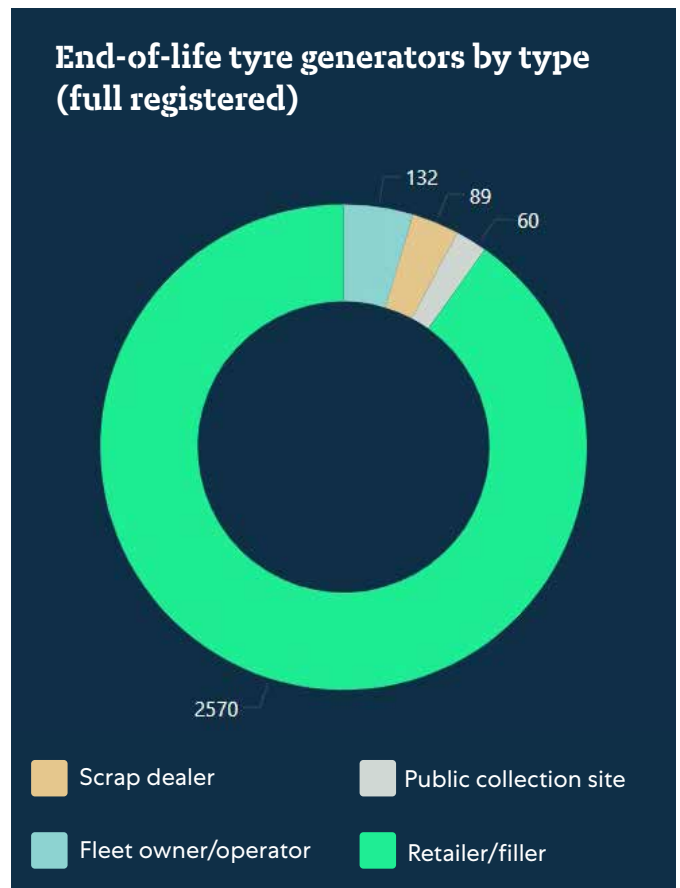

We have carried out 3,840 site and phone visits to gather information and ensure registrants are aware of the steps they needed to take to complete their registrations.

At the end of September, there were 2851 fully registered participants requiring collections.

1,019 registrations were received after 1 August and are in various stages of finalising their registration.

Many registrants have been slow to supply their signed acknowledgment of the code of participation and/or health and safety information we need to share as PCBUs under the Health & Safety at Work Act 2015. There are currently 634 registrants who have received a field visit or call but cannot be completed for this reason.

### End-of-life tyre generators by type (full registered)

## Public collection network

As of 1 October 2024, we have finalised contracts with 60 public collection sites.

A further 27 sites are at various stages in the process of becoming registered, such as satisfying health and safety requirements, or considering service level agreement preparation, as many remain concerned about an unmanageable influx of legacy tyres coming from commercial entities taking advantage of the 5-tyre per day limit.

The majority of registered sites are transfer stations or landfills.

### Gaps in the public collection network

The current gaps in the collection network are in the major centres of Hamilton and Tauranga, and the Hawke's Bay and Southland regions.

## Objective 3

### Tyre processing volumes

During the first year of the Tyrewise Scheme, fee incentive payments will be made to registered tyre processors to support the processing of more than 14,000 tonnes of tyres into tyre-derived products (TDP) or tyre-derived fuel (TDF) for eligible sale to the domestic market.

#### Reporting Requirements

- Processing volumes, end of life product manufacturing, and sales data by % of Tyre Derived Product or Tyre Derived Fuel used, will be provided to the Ministry through the waste tracking tool Dashboard and quarterly reporting.
- Data on the number of participants receiving incentive payments, the total amount of incentive payments made to participants, and an assessment of the effectiveness of the incentive payments on the different processing outcomes (low value vs high value) will be reported to the Ministry through the waste tracking tool Dashboard, quarterly and annual reporting.

#### Outcome #3 for Objective 3

Incentive payments are dispersed to registered processors who sell their products to verified end users (manufacturers) for further use in a process, or to verified

end users who can verify what % of the TDP/TDF has been included in their manufactured product.

Nationwide processing services delivered for end-of-life tyres (ELT) by registered scheme processors through:

- established processing services, and
- new processing services that have come on line during each quarter.

Incentive payments are dispersed to contracted participants for tyre processing upon evidence of eligible sale, including but not limited to:

- Whole Tyres TW 1
- Feedstock TDF 1 and TDF 2
- Tyre Derived Products TDP 1, 2, 3 and 5
- Manufactured Products TDP 4 and 6
- Tyre Derived Fuel (TDF), sold to registered end users (e.g., Golden Bay Cement's kiln in Whangārei).

#### Outcome #4 for Objective 3

End Market use of Tyre Derived Product (TDP) used in a secondary process, produced as a result of processing of waste regulated tyres and sold to the domestic market or a verified foreign end market:

- new end market uses by volume; and
- new verified end markets that have come on line during that quarter.

# Objective 3 targets for this period

## General targets outcome 3

- a. Continue identifying gaps in waste regulated tyre processing capacity.
- b. Provide evidence of new contracts for this quarter with registered processors for processing services. Copies are provided to the Ministry.
- c. Quarterly reporting of processing volumes.

## Specific targets outcome 3

- d. Additional 3,500 tonnes of tyres processed (6,500 tonnes total)

## General targets outcome 4

- a. Contracts (or similar record of agreement of eligible sale) between registered processors and registered manufacturers are established and maintained where that manufacturer applies for an incentive payment. Copies provided to the

- Ministry for any new agreements in the quarter.
- b. Provide evidence of exporting to a verified foreign end market for exported product for use in a secondary process, by a registered processor.
- c. Provide evidence of exporting to a verified foreign end market of whole tyres for use in a primary process by transporter or a processor.
- e. Quarterly reporting of end market volumes sold to registered participants.

## Specific targets outcome 4

- e. Sale of 3,000 tonnes of TDF and/or TDP used in a secondary process. Total 5,500 tonnes

## Gaps in capacity

With an estimated 40% of tyres currently captured for processing, recycling and repurposing, there are significant gaps in the processing and manufacturing capacity needed to reach the target of 80% by the end of the fourth year of operation.

Export to verified foreign end markets will remain a necessary part of the system for quite some time.

Of particular note is a historical lack of processing capacity in the South Island, further limited by the closure of Tyre Collection Services' processing plant recently. There is also limited capacity nationwide for large off-road tyres (OTRs).

We expect that over the medium term this will be addressed in part by incentives for processing, and in part by scheme investments.

## Verified foreign end-markets

The scheme requires that any end-of life tyres or tyre derived products exported to foreign end-markets are subject to a verification process. Tyrewise does not pay incentives for the exported volumes, however it does

cover the cost of end-market verification, and account for the volumes exported.

The verification process is carried out on behalf of the scheme by Intertek through a data share agreement the scheme has with Tyre Stewardship Australia.

Factors considered in the process include:

- Environmental factors; and
- Health & Safety expectations; and
- Modern Slavery at final delivery point; and
- Distribution of product.

As this is a new system for processors, we are working closely with them to assist the transition. No end-markets were verified prior to 1 September 2024.

## Processing and domestic end-market volumes

No eligible claims have been received at the date of this report. This is not unexpected, as processors and manufacturers work through stock from prior to 1 September.

## Objective 4

### Accurate budget estimation, spending and forecasting

Costs of recoverable activities under the Tyrewise Scheme per EPU cannot exceed the tyre stewardship fee set at \$6.65/EPU. By the end of the first year of the Tyrewise scheme, the PSO will report on budget spends to support annual operational costs and develop future annual budgets demonstrating how and where the Fee will be spent in successive years of the scheme. This will support the mission statement of Tyrewise “Improving the value for end-of-life tyres in cost effective and environmentally sound ways” Future budgets shall be formally captured in an annual Variation to the deed of funding with the Crown to be developed towards the end of Year 1.

#### Reporting Requirements

- Information on transactions made for operational payments (i.e., service fees and incentive payments), and internal costs/transactions (i.e., receipt of the Fee and payment of contractor fees and overheads) will be provided to the Ministry through the Tyrewise tools, PSO accounting system and quarterly and annual reporting.

#### Outcome #5(a) for Objective 4

- Accurate forecasting spends of the Fee by PSO towards quarterly operational costs.
- Actual Year 1 budget information to be used to develop budgets for Year 2, in particular spending forecasts for ongoing operational costs, future funding towards Research and development (R&D) and national infrastructure.
- Year 3 budget will be developed using actual budget data from Years 1 and 2, and so on for Years 4-7.

#### Outcome #5(b) for Objective

- Develop an assessment process for applications from parties seeking funding from the Fee.

## Objective 4 targets for this period

#### General targets outcome 5(a)

- All budget spending aligns with true and reasonable financing statements.
- All budget decreases (underspend) and/or increases (overspend)  $\pm 15\%$  relative to budget estimates are justified.

#### Specific targets outcome 5(a)

- N/A

#### General targets outcome 5(b)

- Assessment criteria
- Summary of applications received, assessed, and approved

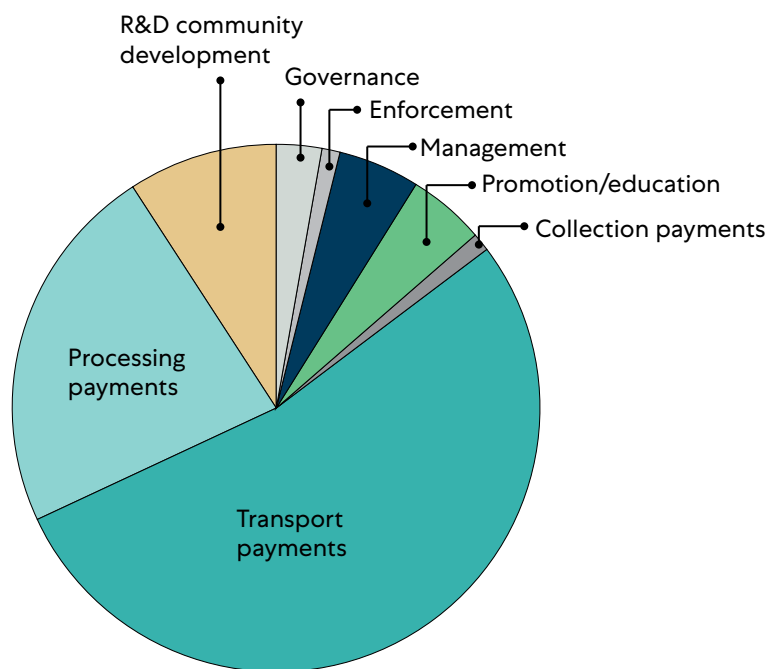

## Spending forecasts

Projected breakdown of projected costs per passenger tyre equivalent (EPU).

Forecast vs actual spending can be found on pages 44-45.

EPU	\$6.65	\$6.65	%	%
Scheme year	1	7	1	7
Governance	\$0.20	\$0.18	3%	3%
Enforcement	\$0.04	\$0.03	1%	1%
Management	\$0.34	\$0.31	5%	5%
Promotion/education	\$0.32	\$0.14	5%	2%
Collection Payments	\$0.09	\$0.08	1%	1%
Transport Payments	\$3.56	\$3.31	54%	50%
Processing Payments	\$1.51	\$2.04	23%	31%
R&D and Community Development	\$0.60	\$0.56	9%	8%
Total	\$6.65	\$6.65	100%	100%

## Year one forecasted breakdown

## Funding criteria and assessment

We are currently in the process of developing the application process and assessment criteria for grant funding.

Applications for grants will open in early 2025 with funds available for distribution from April 2025, subject to availability of the fee.

## Objective 5

### Market growth and investment strategy

During the first year of the Tyrewise Scheme, ASNZ Limited will work towards the future development (i.e., Years 2+) of a Market Growth and Investment Strategy to ensure that any investments improve upon the national tyre management network. It will detail the proposed expansion of Aotearoa New Zealand's end-of-life tyre market from the status quo to a robust national network and domestic economy.

Year 1 activities include:

- Measurement of baselines to track progress from the status quo.
- All assessments and reports to the Ministry to address how Tyrewise will use the information collected to continue to grow New Zealand's ELT market, so as to be formally captured in the Market Growth and Investment Strategy in future years of the Scheme's operations.
- Tyrewise will receive applications and proposals for market development grants such as R&D grants, community or infrastructure investments, though no grants will be offered in the first year and future grants will be subject to availability of funds collected from the Fee.

### Reporting Requirements

- Updates on the measurement of baselines and consideration of the Market Growth and Investment Strategy will be provided to the Ministry through quarterly and annual reporting.
- Further development and implementation of the Market Growth and Investment Strategy will feature in future years (Year 1 onwards) Milestone, Outcomes, and Detailed Budgets, as it relates to the Expected Scheme Effects in the Guidelines in the gazetted requirements.

### Outcome #6 for Objective 5

Begin developing a Market Growth and Investment Strategy that sets out the expansion of New Zealand's ELT market from what is already established (e.g., status quo) to a robust national network.

New business ventures, small and large, will participate in the scheme to improve its capacity, capability, and geographical presence (including new operations established in the South Island).

# Objective 5 targets for this period

## General targets

- a) Update on development of Market Growth and Investment Strategy.
- b) Measure potential quarterly growth of the ELT management market from the recorded baselines ('status quo').

## Specific targets

- i. N/A

## Market baseline

At the time of reporting, Tyrewise has been fully operational for one month. This is too early to establish baseline volumes for processing and end markets.

We expect to have a much clearer view of current uses and capacity by our 12 month report, by which time Tyrewise will have been fully operational for six months.

## Market opportunities

The two areas that we have identified as an immediate opportunity for end market growth are:

- crumb rubber emulsifiers used for roading; and
- engineered products for civil uses

We are currently in the process of commissioning WSP to update to an earlier report (WSP Report ref 521282.00 – Crumb Rubber Review – 2020 update) on the potential use of crumb rubber as an emulsifier for use in roading.

This report will result in a road map for the producers of crumb rubber suitable for roading quality emulsifiers and the beginning of a NZ Standard which reflects

our specific roading conditions. This report is due for completion by December 2024.

The Tyrewise Rubber in Emulsions technical advisory group will commence in October 2024 in partnership with the New Zealand Transport Agency (NZTA). NZTA will drive the technical aspects with Tyrewise as the recognised funding provider, facilitator and secretariat of the group. This will bring together the procurers (NZTA and potentially local council groups), manufacturers of bitumen, roading contractors, crumb rubber suppliers and WSP. The outcome will be to specifically ensure that the supply chain is ready for a mandated (or similar) supply of a percentage of crumb rubber emulsifier.

## Proposed plants

We have received applications for registrations of interest for proposed processing and manufacturing plants that cover the following products or processes:

- Rubber shred, crumb and powder
- Products as a result of devulcanisation pyrolysis

## Registered processors and manufacturers

Company	Tyrewise Subcategory	Plant location
Waste Management Ltd	Processor	Auckland
Tyrecycle NZ	Processor	Auckland
Revyre Global Ltd	Processor	Canterbury
Hawkes Bay Tyre Shredding	Processor	Hawke's Bay
Golden Bay Cement	Manufacturer (end user)	Northland
Golden Bay Cement	Processor	Northland
Treadlite NZ Ltd	Processor	Waikato
Eco Tyres Recyclers Ltd	Processor	Whanganui

## Objective 6

### Participant awareness / satisfaction

By the end of the first year of the Tyrewise Scheme, a survey (intended to be produced annually) will be conducted across all registered participants and stakeholders to gauge satisfaction of the services received from or provided to the Tyrewise Scheme.

This survey(s) should also clarify the capabilities, sentiment, and make-up of the regulated community.

- It is acknowledged that successful development of the Tyrewise Scheme will require financial investment by registered participants and stakeholders which investment will require continuity and certainty of the Scheme.

### Reporting Requirements

By the end of the first year of the Tyrewise Scheme initial survey conducted which will cover 6 months of operations (from 1 September 2024 to 28 February 2025).

This will be used to establish a baseline for each community of registered participants.

Details concerning survey(s) will be summarised in an Annual Report to the Ministry, and may include participant performance to overcome challenges, satisfaction of the Scheme, and the range of services provided.

### Outcome #7 for Objective 6

Measure user satisfaction and awareness of the Scheme. This will clarify the capabilities, sentiment, and make-up of the regulated community. Users include:

- Registered participants by type/services provided, (i.e., collection, transportation).
- Back-end users of the tools

Measurements of user satisfaction and awareness of the Scheme include but are not limited to:

- Scheme guidelines
- Software and systems (i.e., tracking, and financial system)
- Technical support and call centre
- Contracts/remuneration (i.e., incentive payments rate and service fees)
- Ability to meet obligations under the Scheme and other standards (i.e., NES)

# Objective 6 targets for this period

## General targets outcome 7

- a. Registered participants' understanding of Scheme guidelines and sentiment.
- b. Usage of systems, i.e., online portal/application, tracking and financial systems
- c. Back-end users' satisfaction

## Specific targets outcome 7

- d. Quarterly survey for users feedback completed by 50% of scheme participants.

## Partner communications and awareness

In readiness for regulation coming into effect, Tyrewise directly contacted over 4,000 entities we believed would be impacted by the regulation, encouraging them to register with us.

In addition, we communicated through industry organisations and trade media, and ran a radio campaign targeting likely participants.

### Partner surveys

A participant survey and Tyrewise app user surveys have been designed. We believe it will be more appropriate to deploy these once more participants have completed their registration and experienced the initial operational aspects of the scheme.

### Service channels

The majority of calls to our 0800 number and enquiries through our info@tyrewise email address are from registered or prospective partners.

The most common subjects of enquiries have been completing registrations and Tyrewise app support.

### Support material

A range of support material such as posters, counter cards, stickers and registered partner certificates are available to partners to display at their sites.

## Tyrewise partner support material

## Support channels

July to September inclusive

<b>Service desk tickets received</b>	<b>5,032</b>
<b>Service desk tickets resolved</b>	<b>4,991</b>
<b>0800 calls received</b>	<b>3,281</b>
<b>E-newsletters (all partners)</b>	<b>4</b>
<b>E-newsletter open rate</b>	<b>63%</b>

## Consumer awareness

A public facing paid advertising campaign kicked off earlier in the year as regulation came into effect. Its purpose is to raise awareness and understanding of Tyrewise and to support conversations partners have with tyre users. It remained in market with lighter coverage through winter, and was up-weighted in September and October to coincide with the operational launch of the scheme.

### Media coverage

Media releases by the Minister for the Environment, Tyrewise, and ASNZ, as well as some of our collection site partners, led to media coverage around the time of our operational launch, most notably on Newstalk ZB and RNZ. There were 36 items in the media over this period.

### Consumer support

The majority of calls and enquiries from members of the public are about the location of collection sites. This was particularly noticeable following media coverage of the operational launch.

### Consumer survey

A consumer survey was carried out during September to establish baseline awareness of and attitudes towards Tyrewise. Results will be available in October.

## Paid advertising examples

## Communication channel results July to September inclusive

## Objective 7

### Participant compliance

During the first year of the Tyrewise Scheme, the Recipient will undertake site assessments of all contracted Regulated Product Stewardship Scheme Participants (e.g. tyre retailers, collection sites, tyre transporters, and tyre processors). Site assessments will determine whether the participant is meeting the expectations within the Code of Practice to participate in the Tyrewise Scheme and compliance with any contractual agreements entered by participants with the PSO (or its agent) to receive payments from the Tyrewise Scheme.

All instances of importers or tyre retailers' non-compliance of sale of regulated tyres in accordance with the scheme observed or reported to the Scheme Manager will be escalated to the Ministry for appropriate action under the Waste Minimisation Act 2008 (WMA).

Instances of observed breaches of the Health and Safety at Work Act and other non-MfE Acts and Regulations should be referred to the relevant Government or local authorities.

Instances of not operating within the intent of the Code of Practice or other relevant agreements relating to the operation of the scheme will be managed in accordance with the policies and procedures of the scheme.

#### Reporting Requirements

- Scheme Participant assessment findings will be summarised by the Recipient for the Ministry on a quarterly basis as part of the required Milestone Reporting.
- The Recipient will notify the Ministry of all instances of non-compliance of sale of a regulated tyre in accordance with the scheme under the WMA within 10 days of the non-compliance being detected for the Ministry to investigate further.

#### Outcome #8 for Objective 7

Establish robust performance monitoring (non-WMA) processes for liable parties and registered participants, and monitor the performance of these processes, including any escalation action from the Scheme Manager to the PSO taken for:

- Liable Parties and Registered participants by type (i.e., what are their performance requirements with the scheme that were breached)
- Mitigation of key risks for the operational delivery (as per risks section)

Note: an example of a 'performance monitoring process' that mitigates key risks might be requiring proof of purchase for tyres collected at the same point of sale (if a retail collection point) to ensure tyre origin or limiting the quantity of tyres accepted at collection sites. Evidence by a public collection site that they are not allowing access to end-of-life tyres to be diverted for re-use.

#### Outcome #9 for Objective 7

Establish reporting process for WMA non-compliance where liable parties appear to not be selling regulated tyres in accordance with the regulated scheme.

- Escalation to the Ministry of any instances where potential non-compliance with the WMA
- The Ministry may pursue further investigation (audits) and enforcement against offenders using the powers available to the Secretary under ss 87, 88 of the WMA.

An example of escalation of potential non-compliance with the WMA is sale of tyres not in accordance with the regulated scheme which may have been identified by a scheme participant who is complying or may be discovered by the scheme manager while undertaking their other assessment duties.

## Objective 7 targets for this period

### General targets outcome #8 for objective 7

- a. Document baseline performance monitoring for each type of liable party and registered participant.
- b. Maintain robust scheme compliance processes to mitigate risks by the Ministry.

### Specific targets outcome #8 for objective 7

- c. Evidence of any random and/or annual field assessments (non-WMA) undertaken in quarter

### General targets outcome #9 for objective 7

- a. MfE notified of any anomalies/non-compliance under the WMA, requiring follow-up audits and potential enforcement actions taken by the Ministry.

### Specific targets outcome #9 for objective 7

- b. Enforcement action undertaken by the Ministry in accordance with the WMA.

## Participant monitoring

Our three field representatives and our service delivery team have been visiting and calling all prospective participants prior to finalising their registrations. Our field reps will continue to visit participants on an ongoing basis.

The scheme requires all participants sign an acknowledgment of their receipt of the code of participation.

Additionally, participants that require end-of-life tyre collections must supply health and safety information to the scheme. This is because of the shared responsibility participants have for the transporters that enter their sites under the Health and Safety at Work Act 2015.

## Encouraging acting in accordance with regulations and the scheme

One of the most important aspects of field visits is to ensure that participants have all of the information they need to act in accordance with the scheme.

This includes checking that the tyre stewardship fee is being correctly charged, and that participants understand their obligations as described in the code of participation.

To assist importers to comply with the regulations, we have held webinars in conjunction with NZ Customs and Ministry for the Environment, for importers, customs brokers and freight forwarders.

**3,840**

Field visits or calls made to prospective participants to 3 October.

We have identified a number of areas where we are seeing issues.

## Health and safety

A large number of participants requiring end-of-life tyre collections either do not have health and safety documentation or are reluctant to supply it. As a fall-back, we are currently accepting photographs of hazard boards, or site photographs. To help raise the standard of this information in the industry, we intend to facilitate webinars for participants on their health and safety obligations under the Health and Safety at Work Act 2015, as well as to the scheme.

## Correct use of tariff codes

Many importers have expressed uncertainty about applying accurate tariff codes. In some instances, it has come to light that importers have historically used incorrect tariff code interpretation.

Importers have always been able to apply for tariff code rulings from NZ Customs to be certain they are using the correct codes. However these were only able to be relied on by the importer they were issued to.

NZ Customs has now agreed that Tyrewise can request tariff code rulings on behalf of the industry, and these are published on NZ Customs' website.

## Tariff code alignment

Many importers have expressed frustration at the lack of nuance in applicable fees due to the mechanism of tariff codes.

The Ministry for the Environment (MfE) is investigating the legislative options to address this issue, however they require information and guidance from industry. Tyrewise has therefore formed a Technical Advisory Group (TAG) whose role is to:

- share specialist knowledge, such as members' technical knowledge on the tyre market, the practicalities and impacts of different policy options; and
- provide guidance and feedback on draft policy content; and
- be a sounding board for MfE to test their thinking.

The group is made up of importers, retailers and machinery sellers who cover a full range of tyre types and sizes. It has met three times and is making good progress.

## Complaints

Complaints about the regulations themselves should be made to the Ministry for the Environment. If they are received by Tyrewise, they are forwarded to the Ministry.

Complaints against signatories to the code of participation are dealt with in accordance with the complaints process published in the latest version of the code of participation.

The Ministry is currently dealing with four complaints regarding the regulation, and the application of the regulation by the Scheme Manager.

# Complaints process

From the Tyrewise - code of participation 1-3-1 CA v5

Any person may refer a complaint against a signatory to this Code of Participation to the Code Administrator.

The complaint shall be in writing and shall be addressed to the Code Administrator.

The Code Administrator will seek resolution of any complaint. If the complaint is not resolved in a manner acceptable to the Complainant, the Code Administrator shall:

- refer the complaint to the Chair of the PSO (ASNZ) via [info@autostewardship.org.nz](mailto:info@autostewardship.org.nz), with a summary of the nature of the complaint and, where appropriate, general reasons for that outcome; and
- inform the Complainant that the matter has been referred to the Chair and advise generally of the procedure which follows.

All complaints are documented and presented clearly to facilitate appropriate action. They will be reported by the Code Administrator to the Chair and a summary will be made available to Ministry for the Environment, in accordance with the reporting obligations covered in the Deed of Delivery.

In the case of a complaint against a Registered participant, failure of the participant to rectify a

complaint in accordance with the Code Administrator and PSO requirements may result in expulsion of the participant from Tyrewise. This will remove their ability to collect, transport or process end-of-life tyres and withdraw any permission to use the Tyrewise logo and branding. Any other legal rights of Tyrewise and ASNZ as the PSO will be preserved.

Complaints that will immediately be referred to the Chair of the PSO (ASNZ) are those that typically involve serious issues that require higher-level intervention. Here are some examples:

**Legal Violations:** Any complaints regarding illegal activities, such as harassment, discrimination, or financial misconduct

**Mismanagement:** Concerns about the Scheme Manager or Registered Participants actions that may harm the scheme such as mismanagement of funds or unethical behaviour.

**Policy Violations:** Complaints that indicate a breach of policies or ethical standards if they involve significant risks to the Scheme.

**Strategic Concerns:** Complaints that impact the PSO or Scheme's strategic direction or reputation.

## Objective 8

### Scheme delivery audits by the Ministry for the Environment

During the first year of the Tyrewise Scheme, the Ministry will undertake 6-monthly audits of the Scheme to determine whether:

- i. the Recipient and the Scheme Manager are each complying with the terms and conditions of the Deed, that Milestones have been delivered successfully, and the Fee has been used as intended.
- ii. the Recipient and the Scheme Manager are each complying with their responsibilities as Operators of the Scheme under the Waste Minimisation (Tyres) Regulations 2023.
- iii. the RPS Scheme Participants are complying with the Waste Minimisation (Tyres) Regulations 2023.

The Ministry will notify the PSO of any upcoming audits and specific information requirements.

The Ministry will provide the results of the audit to the PSO and Scheme Manager and make recommendations for improvements for the delivery of the scheme and participation by registered participants

# Tyrewise partners

Tyre processing at Waste Management's Wiri site

# Registered partners by region (as at 1 October 2024)

Registered partners are liable parties and participants which have had a field or phone visit from our field or service delivery teams, and provided their signed code of participation (all partners) and health and safety information (those requiring collections). All registered partners are listed on [www.tyrewise.co.nz](http://www.tyrewise.co.nz)
