

**Tyrewise**

**Operational delivery plan**

# **Scheme Management Report**

Milestone 1: 1 September 2024 - 31 December 2024

**I orea te tuatara  
ka patu ki waho.**

**A problem is solved by  
continuing to find solutions.**

**Tyrewise and our registered partners are dedicated  
to finding and developing innovative solutions to  
turn tyre waste into opportunity.**

**This report from the scheme manager is for Milestone  
1 of the Operational Delivery Plan and covers  
operational activities and results for September,  
October, November and December 2024.**

## Objectives and outcomes

	<b>Objective</b>	<b>Outcomes</b>	<b>Page</b>
1.	Transparent and accurate reporting of tyre movements and financial transactions (waste tracking and payment systems).	1	4
2.	Tyre transportation	2	8
	a. volumes		
	b. take back service (tyre collection network)		
3.	Tyre processing volumes.	3, 4	16
4.	Accurate budget estimation, spending and forecasting	5(a), 5(b)	18
5.	Market growth and investment strategy	6	20
6.	Participant Awareness / satisfaction	7	22
7.	Participant compliance	8, 9	26
8.	Scheme delivery audits by the Ministry for the Environment		28
	Registered scheme Participants by region		29
	Forecasted vs actual expenses		46

### Note:

- EPU stands for a standard measure called the Equivalent Passenger Unit (EPU). An EPU is equivalent to the weight of a 'typical' passenger tyre (9.5kg of tyre)
- ELT stands for End-of-life tyres
- Ministry or the Ministry refers to the Ministry for the Environment unless otherwise stated
- OTR refers to oversized off-the-road tyres
- PSO refers to the product stewardship organisation, Auto Stewardship New Zealand (ASNZ)
- TDP stands for tyre derived product(s)
- TDF stands for tyre derived fuel
- The regulations refer to the Waste Minimisation (Tyres) Regulations 2023 unless otherwise stated
- The fee refers to the tyre stewardship fee

# Objective 1

## Transparent and accurate reporting of tyre movements and financial transactions (waste tracking and payment systems)

During the first year of the Tyrewise Scheme, the Scheme Manager will effectively utilise the waste tracking and payment system to:

- Provide a high-quality service to users.
- Record information about mass balances including materials flow from collection to reuse.
- Transparently provide this information to the Ministry and the Public (in aggregated form if required to protect commercially sensitive information).

From 1 September 2024, the Tyrewise Scheme software (waste tracking tool) and payments system will provide information related to the Expected Scheme Effects (see Gazette Notice for General Guidelines for Product Stewardship Schemes for Priority Products Notice 2020 [Gazette Notice 2020]). Relevant information includes Fee usage by the Scheme for incentive payments and other operational payments made to registered participants for ELT collection, transportation, and processing services; volumes of ELTs diverted from landfill for end-use higher up the waste hierarchy; availability/capacity of collection sites across New Zealand, including by location; and clear provision of information about the Scheme, use of funding, and how to access collection sites.

### Reporting Requirements

- Tyrewise shall report all relevant (non-confidential) information to objectives on their website in a form of their choice as an externally facing public update.
- The Ministry will have a series of reports created for them that they can run at any time to deliver this information in real time.
- Additional information to the 'live' information available via the 'Dashboard' will be reported to the Ministry through quarterly and annual reporting, which will be kept confidential by the Ministry.

### Outcome #1 for Objective 1

Effective management of the Waste Tracking System (Tool) and MYOB Acumatica (previously branded Advanced) (registered parties, Payments System) to ensure uninterrupted, reliable, transparent, and accurate tracking of:

- the use of the Fee by registered parties eligible to receive payments, and
- Mass balances of tyres collected, transported, and processed through the Scheme.

Effective management of the Xero (PSO) payments system) to ensure uninterrupted, reliable, transparent, and accurate tracking of the use of the Fee by non-registered parties eligible to receive payment (such as management and governance costs)

## Objective 1 targets for this period

### General targets

- a. Continuous improvements and updates to the Tools
- b. Tool accurately and consistently recording materials flow (mass balances) by registered participants.
- c. Payment Systems accurately and consistently recording Fee remitted to registered participants and service providers.

- d. Quarterly reporting of data collected from the Waste Tracking System Tool.

### Specific targets

- e. Payment System(s) accurately recording 99% of all payments.

# Tyrewise app

## Usage

At 31 December 2024 there were 5,309 users of the Tyrewise app. Between 1 September and 31 December 2024, 25,581 collection jobs had been booked and 21,145 completed (not including cancelled, archived, and incomplete jobs).

## Improvements

Two updates were made to the software in September, one in October and one in November. Each included a number of minor bug fixes and improved usability.

An opportunity has been identified to improve location data for sites used by the Tyrewise app so that the various GPS systems transporters use align.

## Reporting

Users can download data for their organisation to use for their own reporting needs.

We use exception reporting to identify situations that differ from what is expected. These are then evaluated for any action needed. For example:

- Patterns of disputed jobs
- Large fluctuations in bookings by count or quantity
- Estimated v actual weight of jobs
- Suspect vehicle weights (i.e. inconsistent weighbridge data)

We use mass balance reporting to determine if processing volumes match end-of-life tyre intake, and check mass transported against payment generated.

## Payments system

We made 260 payments over the period from 1 September to 31 December 2024. Payments were 100% accurate, with no adjustments made.

A small improvement was made to the MYOB Acumatica system so that more information could be supplied to the vendor about the jobs being paid for.

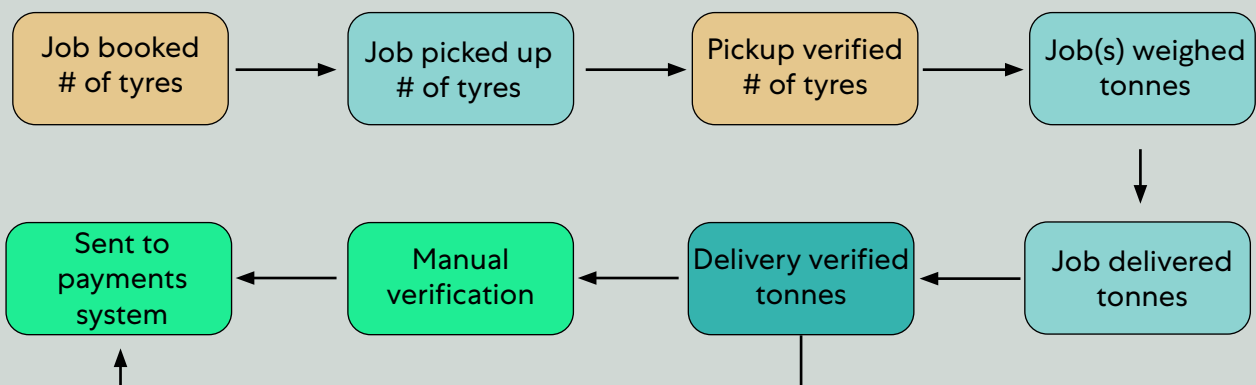

# About the Tyrewise reporting tools

The Tyrewise Reporting Tools are collectively made up of the web based Tyrewise app and payments system (MYOB Acumatica) which track the movement of waste regulated tyres through the take back network and send verified data records for payment. Auto Stewardship New Zealand (the Product Stewardship Organisation, or PSO) uses Xero to record non-participant payments for services such as governance and operations.

## Tyrewise application (app)

The web based Tyrewise app uses a two point verification system to track volumes of waste regulated tyres, reduce the risk of fraud and leakage from the take back network, and send accurate collection volumes to the payments system. It is also used to claim incentives for processing and manufacture.

## Software data collection points (end-of-life tyre collections)

Manual verification is undertaken when there is an incomplete process such as verification step missing or anomaly in estimated vs actual weights.

- End-of-life tyre generator
- End-of-life tyre processor
- Transporter
- Tyrewise

# Mass balance data

Data shown is for imported loose tyres, and vehicles first road registered from 1 March, the day from which the fee was first charged. This data is updated monthly.

Tyre collection data is shown from 1 September, the operational launch date of Tyrewise. The data is updated in the Tyrewise app in real time.

## Tyre movements

Sources:

Loose tyres imported: NZ Customs via Ministry for the Environment

Vehicles first road registered: NZTA Waka Kotahi

Collections: Tyrewise app

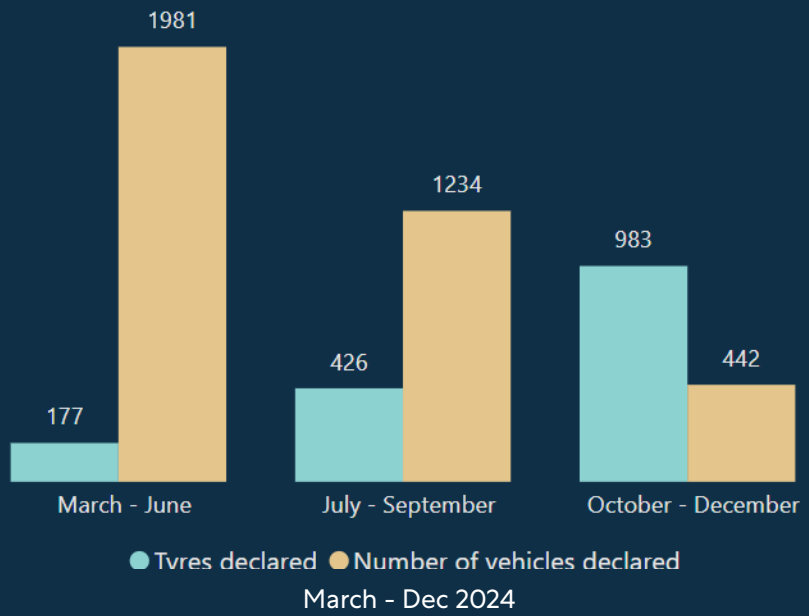

Tyres entering NZ on road registered vehicles is an estimate, as the count of tyres is not recorded for all vehicle types. The number of end of life Tyres collected is based on the verified tyre volume at pick up.

No collections were carried out before the operational launch on 1 September.

## Tyre derived products and fuel sold (tonnes)

Source: Tyrewise app  
claims table

## Objective 2

### Transportation - 2 (a) Volumes

From the 1 September 2024 (during the first 7 months of operating the Tyrewise Scheme), registered tyre transporters will transport more than 13,000 tonnes of ELTs via established registered collection network (e.g., tyre retailers, transfer sites and generators) and/or new registered collection services (e.g., community collection centres).

Registered tyre transporters will deliver ELTs to registered tyre processors.

#### Reporting Requirements

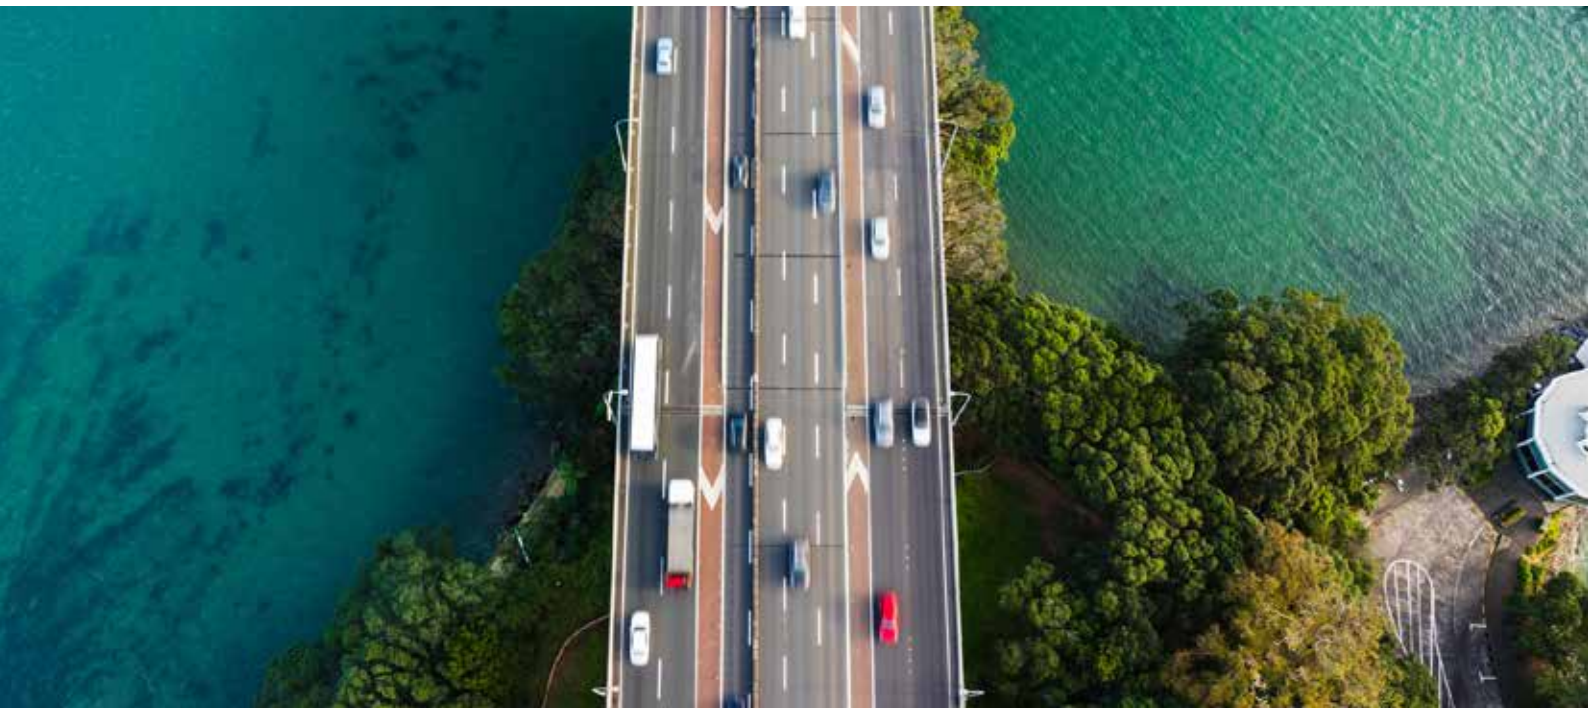

- Data on the scheme's tyre transportation services and financial transactions for Fee payments made to tyre transporters will be provided to the Ministry through the waste tracking tool Dashboard, quarterly and annual reporting.
- Data on the performance of transportation

services (e.g., availability of transportation services; North Island vs South Island, and transportation networks), will be shared with the Ministry through the waste tracking system, quarterly and annual reporting.

#### Outcome #2 (a) for Objective 2 (a)

Effective nationwide transportation of tyres to established and new domestic processing end-uses through:

- Contracts with existing transportation services to manage the current demand for ELTs.
- Contracts with new or existing transportation services to manage increases in demand for ELTs as required.

# Objective 2 (a) targets for this period

## General targets

- a. Continue identifying gaps in New Zealand's ELT transportation services market.
- b. Continue executing contracts with transporters. Updated list of contracted participants.
- c. Quarterly reporting of tyre transportation contracts and volumes.

## Specific targets

- a. Additional 4,500 tonnes of tyres collected and transported to verified domestic end-use (8,000 tonnes total).

**21,100 tonnes**  
of end-of-life tyres were collected during this period.

Between 1 September and 31 December, Tyrewise registered transporters had completed 21,145 jobs, comprising 21,100 tonnes in total.

A median of 190 tyres in total per location have been collected to 31 December. Initial collections were an average of 64 tyres per location.

Many generators have chosen regularly recurring collection jobs. These are automatically generated by the app after the previous job has been picked up.

Initially there was a high level of enquiry from retail sites about the timing of booked collections. This has settled down as they have become familiar with the regular runs that transporters have in place in their areas, particularly for recurring jobs.

## Payments to registered transporters

Transport costs were forecast to be 54% of the scheme budget in the first year of operation. \$9,208,126 was paid between 1 September and 31 December.

## Challenges

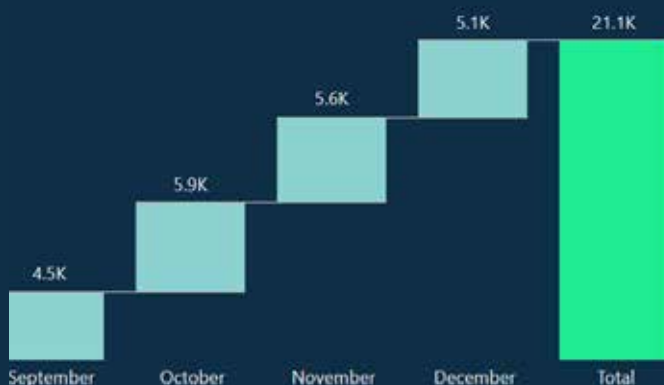

The volume of jobs requiring manual checking before approval for payment remains high. This is partly due to loads falling outside of expected weight parameters. There are also set manual checks in place for organisations which have roles as both a transporter and processor. We are in the process of allocating more internal resource to this function in order to continue to meet our payment commitments .

Oversized off-the-road tyre volumes also continue to be challenging and must be carefully managed to match limited domestic processing capacity, with the rest exported.

## Tonnes collected

**21,100 tonnes collected**

## Number of transporters by region

## Objective 2

### Transportation - 2 (b)

### Take-back service (tyre collection network)

From the 1 September 2024 till 1 April 2025, (the first 7 months the Tyrewise scheme is fully operational), nationwide collection sites will receive tyres from consumers at up to 5 tyres per visit, specifically:

- established services (e.g. tyre retailers, transfer sites and generators) will receive tyres from their own activities; and
- new collection services (e.g., community collection centres).

This is to provide a free and accessible take-back service. All tyres received by collection services will enter the Scheme via registered transporters (as specified in Objective 2a in the previous pages).

Tyrewise Scheme will quantify the number of tyres received at collection sites for the purposes of:

- Future market analysis (Objective 5)
- Identifying and reconciling tyre leakage downstream of collection (refer to Risks and Mitigations).
- Reporting Requirements

### Outcome #2 (b) for Objective 2 (b)

Free and accessible collection of tyres at registered collection sites (including generators, retailers, transfer stations and community networks) through:

- Contracts with existing collection sites (i.e., retailers) for ELT collection nationwide.
- Contracts with new collection sites (i.e., community transfer stations) ELT collection nationwide.

## Objective 2 (b) targets for this period

### General targets for outcome #2(b)

- Continue identifying gaps in New Zealand's ELT collection site infrastructure
- Contracts with collection sites are established and maintained for actual volume of ELTs collected over the quarterly period
- Updated list of contracted participants is provided to the Ministry
- Measure ELT volumes collected for future market analysis and identifying tyre leakage from scheme
- Quarterly reporting of tyre collection contracts and volumes
- N/A

### Specific targets

## 4,742 members of the take back collection network

(organisations with multiple roles counted multiple times).

## Tyre generators

Commercial generators of waste regulated tyres, include tyre retailers, and fitters that form the foundation of the take back system, as well as other commercial operations that generate end-of-life tyres.

These organisations receive free collection of waste regulated tyres by registered Tyrewise transporters.

Registrations of tyre generators have slowed down to a handful each day in December.

## Public collection network

At the end of December we had 77 public collection sites registered and accepting tyres. This is an increase of 27 compared to 1 October 2024. This network now covers from the Far North to Central Otago.

We are working with 32 further sites that are in various stages of registration. We expect the majority of these sites will be ready to accept tyres by the end of the next reporting period.

Collection sites generally consist of transfer stations, community recycling centres, and a few landfills.

## Public collection network volumes

Anecdotally, public collection sites reported an initial influx of tyres (compared to previously), with high volumes of legacy tyres (on which no fee has been paid). Most are now reporting reduced and consistent numbers of tyres being dropped off by residents.

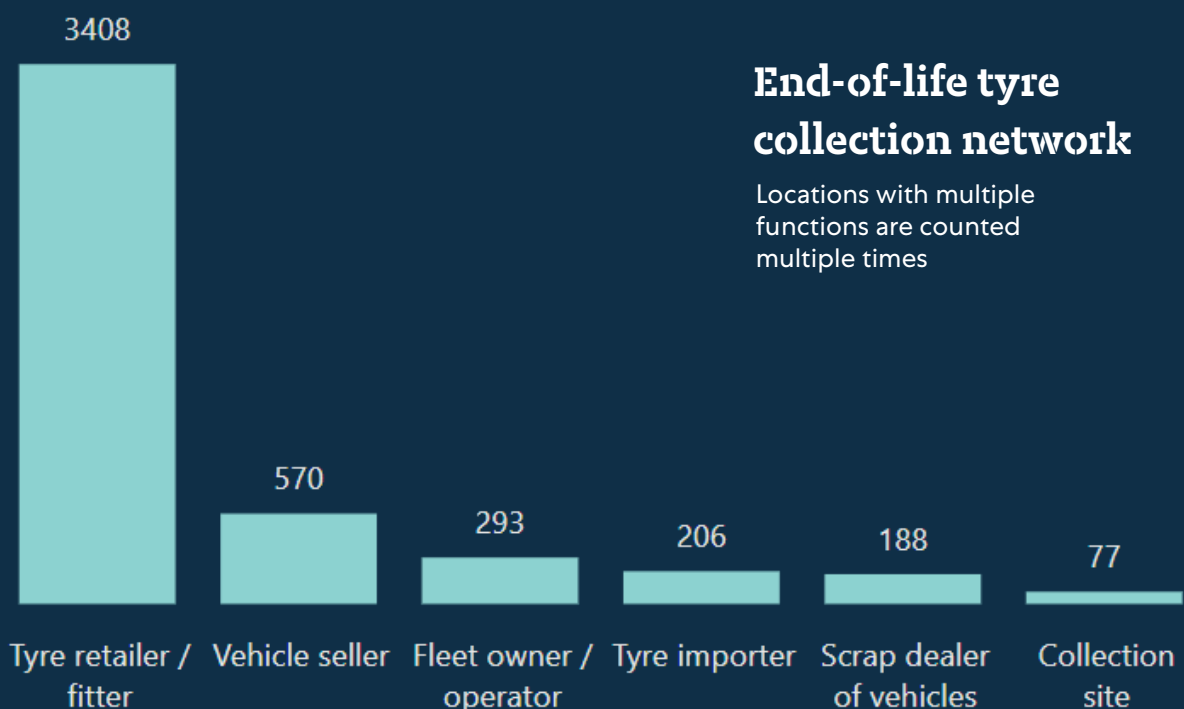

Collection sites are being vigilant to ensure that stockpiles of legacy tyres and commercial loads are not accepted, however practically, this is difficult to put in place.

## Gaps in the public collection network

Regions or districts of concern or that will need additional sites are:

- Hamilton, where we are currently in discussion with relevant parties;
- Tauranga City, where we have one site almost completed and are seeking additional sites
- Gisborne/Wairoa, where we are in discussions with the respective councils.
- Southland, where we are in discussion with both the regional and district councils.

“ Since this scheme started, our team has noticed a huge drop in the number of illegally dumped tyres! ”  
Palmerston North City Council via Facebook

## Distribution of public collection sites

## Objective 3

### Tyre processing volumes

During the first year of the Tyrewise Scheme, Fee incentive payments will be made to registered tyre processors to support the processing of more than 14,000 tonnes of tyres into tyre-derived products (TDP) or tyre-derived fuel (TDF).

#### Reporting Requirements

- Processing volumes, end of life product manufacturing, and sales data by % of Tyre Derived Product or Tyre Derived Fuel used, will be provided to the Ministry through the waste tracking tool Dashboard and quarterly reporting.
- Data on the number of participants receiving incentive payments, the total amount of incentive payments made to participants, and an assessment of the effectiveness of the incentive payments on the different processing outcomes (low value vs high value) will be reported to the Ministry through the waste tracking tool Dashboard, quarterly and annual reporting.

#### Outcome #3 for Objective 3

Nationwide processing services delivered for end-of-life tyres (ELT) by registered scheme processors through:

- established processing services, and
- new processing services that have come online during each quarter.

Incentive payments are dispersed to contracted participants for tyre processing upon evidence of eligible sale, including but not limited to:

- Processed from Feedstock (TDP1, TDP2, TDP3, TDP4)
- Feedstock/Tyre Derived Aggregate (TDF1, TDF1e, TW2, TW6)

#### Outcome #4 for Objective 3

End Market use of Tyre Derived Product (TDP) used in a secondary process, produced as a result of processing of New Zealand ELT tyres and sold to a verified end market:

- new end market uses by volume; and
- new verified end markets that have come online during that quarter.
- Tyre Derived Fuel (TDF), sold to registered end users (e.g., Golden Bay Cement's kiln in Whangarei).

Incentive payments are dispersed to registered processors who sell their products to verified end users (manufacturers) for further use in a process, or to verified end users who can verify what % of the TDP/TDF has been included in their manufactured product. Including but not limited to:

- Processed from Feedstock (TDP1, TDP2, TDP3, TDP4)
- Feedstock/Tyre Derived Aggregate (TDF1, TDF1e, TDF2, TDP6)

# Objective 3 targets for this period

## General targets outcome 3

- a. Continue identifying gaps in waste regulated tyre processing capacity.
- b. Provide evidence of new contracts for this quarter with registered processors for processing services. Copies are provided to the Ministry.
- c. Quarterly reporting of processing volumes.

## Specific targets outcome 3

- d. Additional 4,000 tonnes of tyres processed (5,000 tonnes total).

## General targets outcome 4

- a. Contracts (or similar record of agreement of eligible sale) between registered processors and registered manufacturers are established and

maintained where *that manufacturer applies for an incentive payment*. Copies provided to the Ministry for any new agreements in the quarter.

- b. For exported product for use in a secondary process, where the registered processor exports their product, provide evidence of exporting to a Verified Foreign End Market.
- c. Quarterly reporting of end market volumes of TDP 2,3, and 5 sold to registered participants.

## Specific targets outcome 4

- e. Sale of 3,000 tonnes of TDF 1 and 2 and/or TDP 1, 2, 3 and 5 used in a secondary process. Total 5,500 tonnes

**7,749.3 tonnes**  
Used in tyre derived fuel  
and products

**7,098.9 tonnes**  
of this was used in manufacture

Incentives are payable for processing waste regulated tyres into product sold to the domestic market only. From Year One through to Year Seven of the scheme, incentives are used to encourage the uptake of domestically produced product and reduce the volume of exported product (whole or processed tyres).

The claims paid were for TDP2 (Rubber granulate), and TDP4 (End use/fabricated products made up of 75% by weight of TDP 1-3), as well as TDF 1 (Tyre Derived Fuel Feedstock).

## Exported product

There is more than enough capacity for processing all of our waste regulated tyres domestically (see baseline information in Objective 5); the Waste Minimisation (Tyres) Regulation 2023 prohibits payment of any incentive for exported product, whether in its processed form or whole baled/cut form.

This, coupled with an immature domestic market for the take up of rubber products has put significant pressure on the ability of registered transporters to deliver collected waste regulated tyres to any processor that has the demand and capacity for those tyres.

To avoid domestic stockpiling of waste regulated tyres, keeping export markets open for our excess supply is critical.

The current shortage of shipping containers from New Zealand to overseas markets, primarily in India and Malaysia, coupled with the requirement that these markets are verified by Tyrewise, means that this activity is an economic barrier for those prepared to export.

## Incentive payments made

Type	Tonnes	Payment
Tyre derived fuel	7512.8	\$2,708,125.09
Tyre derived products	236.5	\$86,327.25
Used in manufacture	7,098.9	\$196,332.66

## Objective 4

### Accurate budget estimation, spending and forecasting

Costs of recoverable activities under the Tyrewise Scheme per EPU cannot exceed the Tyre Stewardship Fee set at \$6.65/EPU.

By the end of the first year of the Tyrewise scheme, the PSO will report on budget spends to support annual operational costs and develop future annual budgets demonstrating how and where the Fee will be spent in successive years of the scheme. This will support the mission statement of Tyrewise “Improving the value for end-of-life tyres in cost effective and environmentally sound ways” Future budgets shall be formally captured in an annual Variation to be developed towards the end of Year 1.

#### Reporting Requirements

- Information on transactions made for operational payments (i.e., service fees and incentive payments), and internal costs/transactions (i.e., receipt of the Fee and payment of contractor fees and overheads) will be provided to the Ministry through the Tyrewise waste tracking and payments system Dashboard, PSO accounting system and quarterly and annual reporting.

#### Outcome #5(a) for Objective 4

- Accurate forecasting spends of the Fee by PSO towards quarterly operational costs.
- Actual Year 1 budget information to be used to develop budgets for Year 2, in particular spending forecasts for ongoing operational costs, future funding towards R&D and national infrastructure.
- Year 3 budget will be developed using actual budget data from Years 1 and 2, and so on for Years 4-7.

#### Outcome #5(b) for Objective 4

- Develop an assessment process for applications from parties seeking funding from the Fee.

## Objective 4 targets for this period

#### General targets outcome 5(a)

- All budget spending aligns with true and reasonable financing statements.
- All budget decreases (underspend) and/or increases (overspend)  $\pm 15\%$  relative to budget estimates are justified.

#### Specific targets outcome 5(a)

- N/A

#### General targets outcome 5(b)

- Assessment criteria
- Summary of applications received, assessed, and approved

#### Specific Targets (Outcome 5 (b) for Objective 4

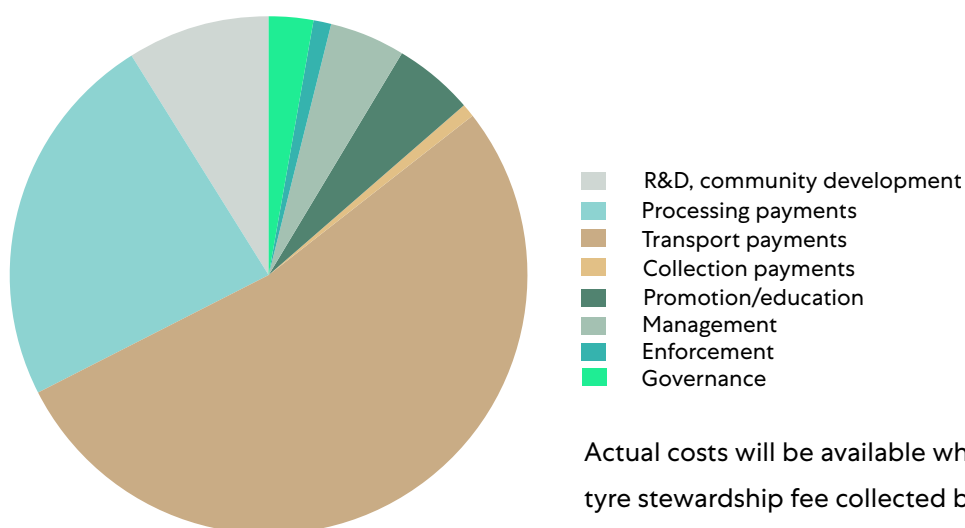

Zero as no applications received, assessed and approved in period.

## Spending forecasts

Breakdown of projected costs of the scheme per passenger tyre equivalent (EPU), as established in July 2023 over the seven year period, with year one being the baseline. Forecast vs actual spending can be found on page 46.

EPU	\$6.65	\$6.65	%	%
Scheme year	1	7	1	7
<b>Projected costs</b>				
Governance	\$0.20	\$0.18	3%	3%
Enforcement	\$0.04	\$0.03	1%	1%
Management	\$0.34	\$0.31	5%	5%
Promotion/education	\$0.32	\$0.14	5%	2%
Collection Payments	\$0.09	\$0.08	1%	1%
Transport Payments	\$3.56	\$3.31	54%	50%
Processing Payments	\$1.51	\$2.04	23%	31%
R&D and Community Development	\$0.60	\$0.56	9%	8%
Total	\$6.65	\$6.65	100%	100%

## Baseline breakdown

Actual costs will be available when the value of the tyre stewardship fee collected by the regulator is made available .

### Key

Governance (PSO)  
 Enforcement/reserve funds (regulator)  
 Scheme Delivery (Management)  
 Promotion/education  
 Collection Site Payments  
 Transport Payments  
 Processing & End Market Payments  
 Foreign End Market Verification (new)  
 R&D & Community Development

### Covers

Trustees, Committees, Steering Groups, Accountancy, Legal  
 Balance of funds less costs, regulation enforcement costs  
 Monitoring, sites audits, managing take back network, Tyrewise App  
 Point of sale, website, education, marketing/communication  
 Public sites that receive non-commercial drop offs  
 Trucking companies that pick-up tyres and take them to processors  
 Incentives paid for TDF/TDF for eligible domestic sales  
 Tracking tyres exported from NZ (audit system)  
 Grants / Contestable Funds (from April 2025)

## Objective 5

### Market growth and investment strategy

During the first year of the Tyrewise Scheme, ASNZ will work towards the future development (i.e., Years 2+) of a Market Growth and Investment Strategy to ensure that any investments improve upon the national tyre management network. It will detail the proposed expansion of Aotearoa New Zealand's end-of-life tyre market from the status quo to a robust national network and domestic economy.

Year 1 activities include:

- Measurement of baselines to track progress from the status quo.
- All assessments and reports to the Ministry to address how the Recipient plans to use the information collected by the Scheme to continue to grow New Zealand's ELT market, so as to be formally captured in the Market Growth and Investment Strategy in future years of the Scheme's operations.
- ASNZ will receive applications and proposals for market development grants such as R&D grants, community or infrastructure investments, though no grants will be offered in the first year and future grants will be subject to availability of funds collected from the Fee.

### Reporting Requirements

- Updates on the measurement of baselines and consideration of the Market Growth and Investment Strategy will be provided to the Ministry through the waste tracking tool Dashboard, quarterly and annual reporting.
- Further development and implementation of the Market Growth and Investment Strategy will feature in future years (Year 1 onwards) Milestone, Outcomes, and Detailed Budgets, as it relates to the Expected Scheme Effects in the Guidelines.

### Outcome #6 for Objective 5

Begin developing a Market Growth and Investment Strategy that sets out the expansion of New Zealand's ELT market from what is already established (e.g., status quo) to a robust national network.

New business ventures, small and large, will participate in the scheme to improve its capacity, capability, and geographical presence (including new operations established in the South Island).

# Objective 5 targets for this period

## General targets

- a) Update on development of Market Growth and Investment Strategy.
- b) Measure potential quarterly growth of the ELT management market from the recorded baselines ('status quo').

## Specific targets

- i. N/A

Capacity	Baseline March 2024*	Target Year Seven**	As at time of reporting (annualised)
Input – Whole Tyre Tonnes	60,860	65,860	90,897***
Processing (TDF/TDP)	31,000	65,201	78,300***
Domestic market sales	36,500	59,274	36,500
* Baseline Mass Balance & Financial Model, July 2023 ** ASNZ Service Level Agreement with processors *** Indicates where current capacity exceeds targets set			

## Baseline and capacity

Our target is for 80% of collected waste regulated tyres to be processed and sold to the New Zealand domestic by the fourth year of operation, and 90% by the sixth year. The balance is to be exported.

Using data collected to date, the trajectory of whole tyre tonnes made available for collection by Tyrewise will exceed the input targets modelled at the time of accreditation of Tyrewise.

## Tyres in roading

As indicated in our previous report, we have commissioned WSP to update an earlier report on using crumb rubber from end-of-life tyres in roading.

The report is currently with NZTA Waka Kotahi for comment before being finalised.

However, a key observation is that several barriers or gaps identified in the previous report have been addressed or further progressed.

In the absence of a mandate from NZTA Waka Kotahi to use tyre derived products in roading, a review of existing specifications would need to remove clauses that inadvertently act as a barrier to their use. In addition, the whole of life price vs performance would need to be favourable compared to other materials.

The report makes a number of recommendations to support pathways for the market to implement technologies that utilise end-of-life tyres.

## Registered processors and manufacturers

## Objective 6

### Participant awareness / satisfaction

By the end of the first year of the Tyrewise Scheme, a survey (intended to be conducted annually) will be conducted across all registered participants and stakeholders to gauge satisfaction of the services received from or provided to the Tyrewise Scheme (e.g., the waste tracking system, incentive payments).

This survey(s) should also clarify the capabilities, sentiment, and make-up of the regulated community.

It is acknowledged that successful development of the Tyrewise Scheme will require financial investment by registered participants and stakeholders which investment will require continuity and certainty of the Scheme.

### Reporting Requirements

By the end of the first year of the Tyrewise Scheme initial survey conducted which will cover 6 months of operations (from 1 September 2024 to 28 February 2024).

This will be used to establish a baseline for each community of registered participants.

Details concerning survey(s) will be summarised in an Annual Report to the Ministry, and may include participant performance to overcome challenges, satisfaction of the Scheme, and the range of services provided.

### Outcome #7 for Objective 6

Measure user satisfaction and awareness of the Scheme. This will clarify the capabilities, sentiment, and make-up of the regulated community. Users include:

- Registered participants by type/services provided, (i.e., collection, transportation).
- Back-end users of the waste tracking and financial systems, or any other system (i.e., TW staff, software developers, contractors, and administration).

Measurements of user satisfaction and awareness of the scheme include but are not limited to:

- scheme guidelines
- Software and systems (i.e., tracking, and financial system)
- Technical support and call centre
- Contracts/remuneration (i.e., incentive payments rate and service fees)
- Ability to meet obligations under the Scheme and other standards (i.e. NES)

# Objective 6 targets for this period

## General targets outcome 7

- a. Registered participants' understanding of Scheme guidelines and sentiment.
- b. Usage of systems, i.e., online portal/application, tracking and financial systems
- c. Back-end users' satisfaction

## Specific targets outcome 7

- d. Quarterly survey for users feedback completed by 60% of scheme participants.

## Brand awareness and perceptions - tyre buyers

Tyre buyers who pay the tyre stewardship fee for the end of life management of their tyres are an important stakeholder in the scheme.

Our marketing activity has a goal of educating these consumers about the tyre stewardship fee and what it is used for.

An additional goal is to support the conversations that our registered partners have with their customers who are paying the fee.

We asked Kantar, a market research company, to carry out research to establish a baseline of brand awareness and perceptions.

The research was carried out in the last half of September with a sample size of 1,000 respondents, nationally representative of age, gender and region.

### Brand perceptions

25% of respondents had heard of Tyrewise, which is at the level to be expected for a new initiative. This is a baseline we will measure against in the future.

Among those who are aware of Tyrewise, 78% had a correct understanding of what the scheme was for, and 12% mentioned the fee.

The majority of these also associate Tyrewise with perceptions of ending tyre waste in New Zealand.

66% of respondents felt very positive (22%) or somewhat positive (44%) about Tyrewise in general.

## Communications performance

The research was carried out while a September flight of advertising was in market. Ad recognition was relatively low, but was significantly higher among those aware of Tyrewise.

Respondents felt the campaign was well branded - it scored significantly above the norms for video, radio and static advertising.

Almost all respondents found the advertising easy to understand. The majority said the ad made them feel more positively towards Tyrewise, with only a small proportion having a more negative opinion.

### At a glance

#### Top level findings from research carried out by Kantar

**25%** of respondents were aware of Tyrewise

**78%** of those who were aware of Tyrewise have a correct understanding of the purpose of the scheme

**66%** of respondents felt very or somewhat positive about Tyrewise

**Almost all** respondents found the advertising easy to understand

**A majority** of respondents say the advertising made them feel more positive about Tyrewise

## Partner communications and awareness

Communication has continued through the same channels as in our previous report. The core information channels for participants are:

- Resources in the Tyrewise toolbox on the website
- Email newsletters
- Field visits
- Service desk enquiries via email and phone

## Partner surveys

Participant surveys will be conducted in a number of ways. As well as a survey on general attitudes towards Tyrewise, we will also carry out surveys regarding the software for all users, and satisfaction with service delivery interactions such as field visits and email enquiries. We will also be seeking feedback from generators of end-of-life tyres on the service of our transport partners.

Results of the surveys will inform future improvements to service delivery and communication.

The first survey to registered partners will be sent shortly.

## Support channels

1 September to 31 December

<b>Service desk tickets received</b>	<b>4,202</b>
<b>Service desk tickets resolved</b>	<b>4,681</b>
<b>Resolved within target time</b>	<b>75%</b>
<b>0800 calls received*</b>	<b>4,581</b>

\*Call report dates slightly out of alignment with calendar months.

## Service channels

The number of service desk tickets has fallen significantly since September. The volume of calls in October and November were roughly half the volume of calls in September, and dropped by a further 50% in December.

We attribute this to the bulk of registrations having been finalised, Tyrewise web app users becoming more familiar with the system, and collections settling into regular patterns for tyre generators.

The bulk of calls relate to remaining registrations, and assistance with booking collections, or adding software users.

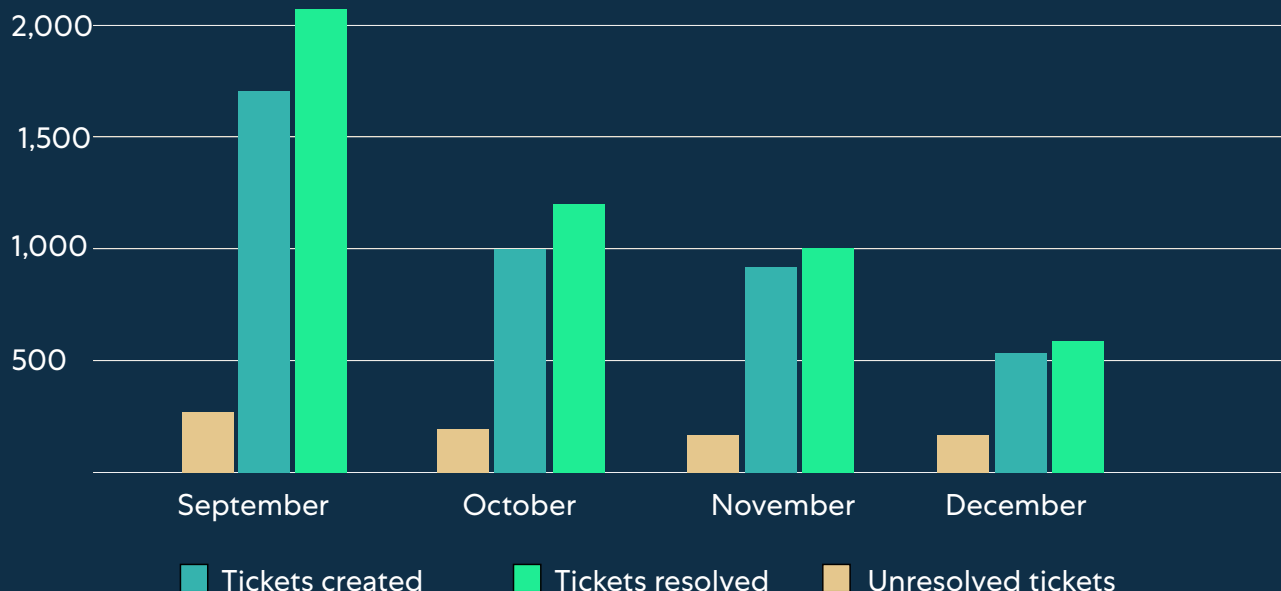

## Service desk ticket volume trends

Source: Freshdesk

A higher number of tickets being resolved than received indicates a backlog being cleared. A number of unresolved tickets are waiting on information from other parties before they can be resolved.

## Objective 7

### Site assessments and performance monitoring

During the first year of the Tyrewise Scheme, ASNZ will undertake site assessments of all contracted RPS Scheme Participants (e.g. tyre retailers, collection sites, tyre transporters, and tyre processors). Site assessments will determine whether the participant is meeting the expectations within the Code of Practice to participate in the Tyrewise Scheme and performance monitoring against any contractual agreements entered by participants with the PSO (or its agent) to be receive payments from the Tyrewise Scheme.

All instances of importers or tyre retailers non-compliance of sale of regulated tyres in accordance with the scheme observed or reported to the Scheme Manager will be escalated to the Ministry for appropriate action under the Waste Minimisation Act 2008.

- Instances of observed breaches of the Health and Safety at Work Act and other non-MfE Acts and Regulations should be referred to the relevant Government or local authorities.
- Instances of not operating within the intent of the Code of Practice or other relevant agreements relating to the operation of the scheme will be managed in accordance with the policies and procedures of the scheme.

#### Reporting Requirements

Scheme Participant assessment findings will be summarised by ASNZ for the Ministry on a quarterly basis as part of the required Milestone Reporting.

#### Outcome #8 for Objective 7

Establish robust performance monitoring (non-WMA) processes for liable parties and registered participants, and monitor the performance of these processes, including any escalation action from the Scheme

Manager to the PSO taken for:

- Liable Parties and Registered participants by type (i.e., what are their performance requirements with the scheme that were breached)
- Mitigation of key risks for the operational delivery (as per risks section)

*Note: an example of a 'performance monitoring process' that mitigates key risks might be requiring proof of purchase for tyres collected at the same point of sale (if a retail collection point) to ensure tyre origin or limiting the quantity of tyres accepted at collection sites. Evidence by a public collection site that they are not allowing access to end-of-life tyres to be diverted for re-use.*

#### Outcome #9 for Objective 7

Establish reporting process for WMA non-compliance where liable parties appear to not be selling regulated tyres in accordance with the regulated scheme.

- Escalation to the Ministry of any instances where potential non-compliance with the WMA
- The Ministry may pursue further investigation (audits) and enforcement against offenders using the powers available to the Secretary under ss 87, 88 of the WMA.

*Note: an example of escalation of potential non-compliance with the WMA is sale of tyres not in accordance with the regulated scheme which may have been identified by a scheme participant who is complying or may be discovered by the scheme manager while undertaking their other assessment duties.*

# Objective 7 targets for this period

## General targets outcome #8 for objective 7

- Document baseline performance monitoring for each type of liable party and registered participant.
- Maintain robust scheme compliance processes to mitigate risks by the Ministry.

## Specific targets outcome #8 for objective 7

- Evidence of any random and/or annual field assessments (non-WMA) undertaken in quarter

## General targets outcome #9 for objective 7

- MfE notified of any anomalies/non-compliance under the WMA, requiring follow-up audits and potential enforcement actions taken by the Ministry.

## Specific targets outcome #9 for objective 7

- Enforcement action undertaken by the Ministry in accordance with the WMA.

**4,961**

participants or prospective participants have had a field visit or a call to 15 January 2025.

**4,097**

organisations had completed their registrations by the end of December 2024.

## Participant monitoring

4,961 participants or prospective participants have had at least one field visit or a call to up until 15 January.

Of these over 4,097 had completed their registrations by 31 December.

During initial field visits and calls, we check that participants know their obligations and have the information they need to act in accordance with the scheme.

On annual follow up field visits, our reps will verify that participants are continuing to act in accordance with the scheme, answer any questions and discuss any concerns participants may have.

## Complaints, breaches of regulations, contracts, or the code of participation

During this reporting period we employed a Manager - Tyrewise Risk and Performance. They are responsible for developing and implementing the system for responding to complaints and suspected breaches of the regulation, contracts, or the code of participation.

The system will be a four stage approach

- Receive, log, assess;
- investigate;
- Respond;
- Resolve

This approach will ensure issues are able to be resolved quickly or enable compliance.

Where breaches of regulation are assessed, there will be clear processes for escalation to the Ministry for the Environment for investigation and enforcement action as appropriate.

## Escalations

We have not escalated any breaches of the regulation to the Ministry in this period.

Of the four previously escalated breaches, only one remains unresolved.

## Objective 8

### Scheme delivery audits by the Ministry for the Environment

During the first year of the Tyrewise Scheme, the Ministry will undertake 6-monthly audits of the Scheme to determine whether:

- i. the Recipient and the Scheme Manager are each complying with the terms and conditions of the Deed, that Milestones have been delivered successfully, and the Fee has been used as intended.
- ii. the Recipient and the Scheme Manager are each complying with their responsibilities as Operators of the Scheme under the Waste Minimisation (Tyres) Regulations 2023.
- iii. the RPS Scheme Participants are complying with the Waste Minimisation (Tyres) Regulations 2023.

#### Reporting requirements

- During the first six months of the Tyrewise Scheme from 1 March 2024 to 31 August 2024, the regulators CME compliance processes in draft will

be firmed up as they are put in place in readiness for operational launch 1 September 2024.

- The regulators CME team will notify the PSO of any upcoming audits and specific information requirements.
- Details concerning these audits will be summarised in an Annual Report to the Ministry.

#### Notification of audit

The Ministry has notified ASNZ and the scheme manager of the first baseline audit, which will be undertaken by BDO Wellington Audit Ltd.

An audit plan was developed in this reporting period.

The Ministry will provide the results of the audit to the PSO and Scheme Manager and make recommendations for improvements for the delivery of the scheme and participation by registered participants.

# Registered partners by region (as at 31 December 2024)

Registered partners are liable parties and participants which have had a field or phone visit from our field or service delivery teams, and provided their signed code of participation (all partners) and health and safety information (those requiring collections). All registered partners are listed on [www.tyrewise.co.nz](http://www.tyrewise.co.nz)
